

Shuttle Buses

Motiv class 4 electric shuttle buses have been serving communities, resorts, airports and universities since 2015.

Lower TCO and CO₂?

Let us show you how.

After 15 years of carefully listening to and learning from our customers through pilot programs, multi-depot deployments and repeat orders, we have a profound understanding of what fleets need to know, have and do at each stage of their fleet electrification journey.

ON THE ROAD, EVERY DAY

TRUSTED WITH THE MOST REPEAT ORDERS FROM INDUSTRY GIANTS

Electric-fueled. Experience-backed.

THE HEALTHIER CHOICE

The rise in demand for clean transportation is driven by consumers who care about their health and the environment. Air pollution is linked to higher rates of asthma, heart disease and a variety of other health concerns.

The next generation of consumers are 27% more likely to purchase from a brand they believe cares about its impact on people and the planet. Soon to hold most of the purchasing power in the USA, they are also willing to pay more for sustainable products.

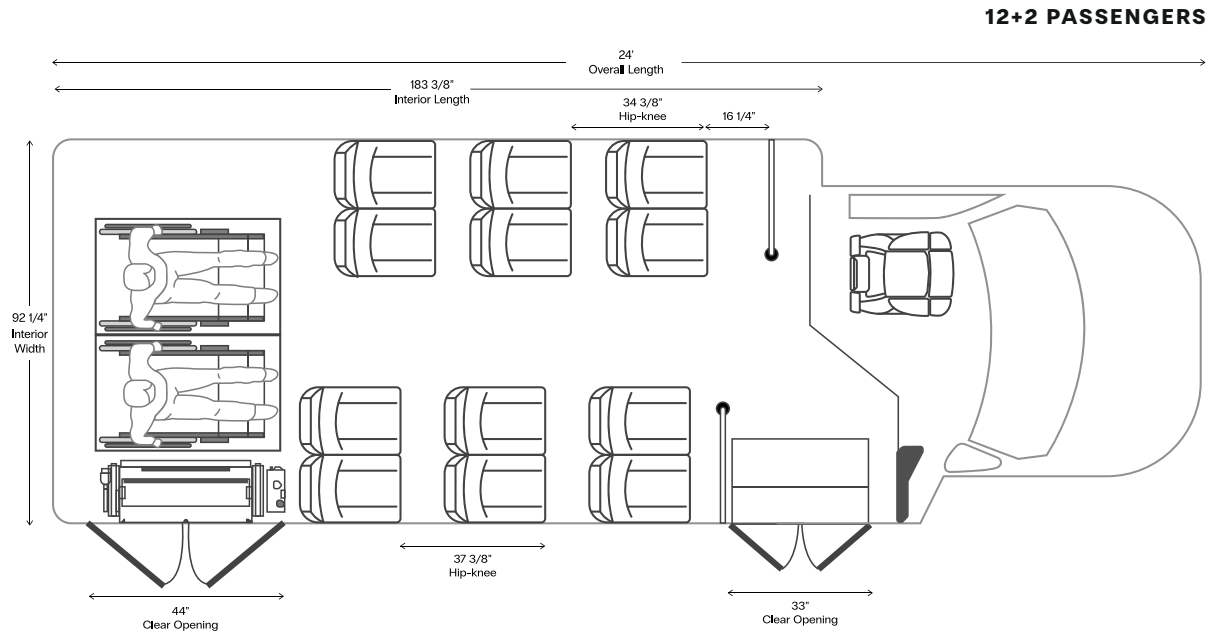

Let us help you meet your sustainability goals and win new customers while providing your passengers a safer and healthier ride.

Class 4 Electric Shuttle Bus Specifications

Motiv Platform	EPIC 4
Passenger Count	Up to 14 passengers, configurations vary
Range	Up to 115 miles
Max GVWR	14,500 lbs
Max Speed	65 mph
Overall Length	24'
Battery Capacity	127 kWh
Battery Technology	Lithium-ion
Gradeability	17%
Regenerative Braking	Configurable
Charge Time [†] , J1772 AC ¹	8.5 hours
Charge Time [†] , CCS1 DC ²	1.75 hours

¹ 10 - 90% Using 240V 80A EV charge station
² 10 - 90% Using 200A EVSE EV charge station

[†] Payload may be less depending on equipment installed
[†] Charge times may vary depending on equipment, environment, time of day, local utility, etc.

Motiv's Premier Partner Network

MPPN is a commercial fleet resource consisting of leading experts that help drive down TCO and accelerate the time to ROI.

Available to support fleets at any stage of electrification, Partners can:

- Save on hard costs: right-size, simplify, and streamline your deployment.
- Save on upfront costs: minimize capital outlay and maximize your budget.
- Save on operational costs: uncover hidden savings by optimizing operations while earning money.

About Motiv Electric Trucks

Founded in 2009 and headquartered in the San Francisco Bay Area, Motiv is a leading manufacturer of medium duty, zero-emission electric trucks and buses. Motiv produces a range of vehicles; including step vans, shuttle buses, box trucks and work trucks, all of which eliminate tailpipe CO2 emissions and particulate matter, while offering drivers and passengers a more comfortable, healthier and safer ride.

Motiv's combination of operational cost savings and environmental performance helps customers meet increasingly stringent emissions and pollution standards as well as achieve their own Net-Zero, ESG or other climate impact-related pledges and commitments.

Built with Leading Bodybuilders
